Rabinarayan Asha

Full Stack Developer / Java Microservices Engineer | 4.9+ Yrs Experience

Email: rabinarayanasha@gmail.com | Phone: +91-8249067001 | Bangalore, India

OBJECTIVE

Experienced Software Engineer specializing in Microservices architecture, Spring Boot, Apache Kafka, and Hibernate. Seeking a challenging role that allows me to leverage my expertise in building scalable and responsive software solutions using cutting-edge technologies.

PROFESSIONAL SUMMARY

- Java Developer with 4.9+ years of experience in Microservices architecture using technologies like Spring Boot, Apache Kafka, Hibernate, and Java 11.
- Extensive experience in designing and developing scalable microservices architectures enabling robust enterprise application software programs.
- Proficient in building event-driven systems and real-time data processing using Apache Kafka, ensuring efficient communication between microservices.
- Strong expertise in database design, HQL, and Hibernate, ensuring efficient data storage, query optimization, and transactional retrieval.
- Hands-on experience in developing applications using design patterns including Singleton, Factory, Builder, and DAO.
- Proficient in frontend development using React.js, React Redux, Material UI, JavaScript, Bootstrap, Node.js, HTML5, and CSS3 to create responsive and user-friendly web interfaces.
- Well versed with popular Java IDEs: IntelliJ IDEA, Eclipse, STS, and VS Code.
- Skilled in Agile/Scrum methodologies, continuous integration, and DevOps practices using Git, GitHub, SVN, Maven, Docker, Kubernetes, Jenkins, and Jira.

TECHNICAL SKILLS

• Programming Languages: Java 11, Java 8, JavaScript, TypeScript, SQL, HTML5, CSS3
• Frameworks & Technologies: Spring Boot, Spring Framework, Apache Kafka, Hibernate ORM, REST APIs, HQL
• Frontend Technologies: React.js, React Redux, Material UI (MUI), Bootstrap, jQuery, Node.js
• Database Management: PostgreSQL, Oracle Database, MySQL, Redis Cache
• DevOps, Cloud & CI/CD: Docker, Kubernetes, Jenkins, Amazon AWS (S3, Cloud), Git, GitHub, SVN, Maven
• Quality & Observability: Mockito, JUnit, Confluent Kafka Control Center, Dynatrace APM, SonarLint, Jira

WORK EXPERIENCE

Infosys — Technology Analyst

August 2021 – Present | Bangalore, India

- Design, develop, and maintain high-performance microservices-based applications following best practices for scalability, modularity, and fault tolerance.
- Architect event-driven systems and real-time streaming pipelines using Apache Kafka and Confluent Control Center for inter-service communication.
- Write unit tests, integration tests, and end-to-end tests with Mockito and JUnit, analyzing defects and bug fixing across DEV, SIT, and UAT.
- Work closely with cross-functional teams, including product managers and architects, to gather requirements and deliver high-impact features.

SOFFRONT Software Pvt Ltd — Jr Java Developer / Full Stack Developer

January 2021 – August 2021 | Kolkata, India

- Engineered cloud-based SaaS CRM platform features spanning marketing, sales, service, and operations hub modules.
- Developed service, process, and integration layers on the backend in Java and Spring; migrated DAO logic from Spring JDBC to Hibernate.
- Created interactive responsive UI using React.js, React Redux, and Material UI, integrating Amazon S3, Twilio SMS, and SendGrid email APIs.

PROJECTS DETAIL

Project 1: Income Tax Return Processing Engine (CPC 2.0)

Role: Back-end Developer | Team Size: 25 | Duration: Aug 2021 – Pres

• Tech Stack: Java 11, Spring Boot, Apache Kafka, Hibernate, PostgreSQL, Oracle, Redis, Docker, Kubernetes, Jenkins, Mockito, Dynatrace
• Description: CPC 2.0 system implemented as a group of microservices processing millions of tax returns from E-filing portal to return processing (RP) lifecycle.

- Data-Inwarding Microservice: Loads returns filed by taxpayers from the e-filing portal and streams events.
- Validation Microservice: Validates returns against complex statutory criteria and rules.
- Tax Calculation & Interest: Executes business rules for income computation, deductions, tax liability, and statutory interest.

- TDS/TCS Matching: Handles reconciliation of tax claimed vs deducted under TDS and TCS at scale.

Project 2: SOFFRONT CRM (Customer Relationship Management)

Role: Full Stack Developer | Team Size: 15 | Duration: Jan 2019 – Aug

• Tech Stack: Spring, Hibernate, React.js, React Redux, Material UI, Java 8, JavaScript, MySQL, Amazon AWS S3, Twilio, SendGrid

• Description: Cloud-based multi-tenant SaaS CRM consolidating customer interactions, automated workflows, document management via Amazon S3, and appointment schedulers.

- Engineered lead capture web-forms, scheduler-driven popup reminders, and automated SMS/email pipelines.
- Migrated DAO persistence layer from Spring JDBC to Hibernate, accelerating query response and code maintainability.

EDUCATIONAL DETAIL

• B-Tech in Computer Science & Engineering (2012–2016) — Biju Patnaik University (BPUT), Odisha (7.1 CGPA)

• Intermediate / +2 Science (2010–2012) — CHSE, Orissa (68%)

• High School Certificate / HSC (2010) — Board of Secondary Education, Orissa (76%)
